PROFILE

I am a data-orientated IT developer in training with a strong interest in design, building, testing and the implementation of software systems.

I am familiar with a wide range of applications and languages and have been actively immersing myself within the many branches of the wider IT field. I am actively searching for a new and relevant career opportunity for this next stage of my career in Cape Town.

I have been working in the high-paced corporate environment at Raubex PTY Ltd, a leading South African construction, infrastructure development, and mining materials group. I am also studying part-time through UNISA for my diploma in Information Technology and will finish my studies in 2023.

EDUCATION AND SKILLS

2023 - DIPLOMA IN INFORMATION TECHNOLOGY (UNISA)

WORK EXPERIENCE

JAN 2019 - OCT 2022

RAUBEX GROUP LIMITED - RAUBEX (PTY) LTD - RG BROKERS

In 2019 I was transferred to RG Brokers the insurance department for Raubex (Pty) Ltd. We managed over 7 800 Fleet items, and 3 (three) divisions within the group. We started to develop an insurance system that required the client to register fleet claims with the required documentation to assist.

Administrative activities include; To secure systems for efficiency and compliance which are in-line with policies; as well as ensuring accurate and consistent data management and storage. My work also has a direct and strong client interface and communications components.

SEPT 2018

RAUBEX GROUP LIMITED - RAUBEX (PTY) LTD - IT DEPARTMENT
(Temporary contract period - 6 months)

During my contract period at Raubex (Pty) Ltd - IT Department, I assisted with the development and implementation of a procurement system.

My role required me to present a sustainable process lifecycle and liase with providers to assist us with the required information in a timely manner.

I was also actively involved with the purchasing and ordering of Information technology within accordance to our organization strategy.
